ONLINE CATALOG & APPLICATIONS

Explore AP's website and mobile app to discover more about our products and the markets that we serve.

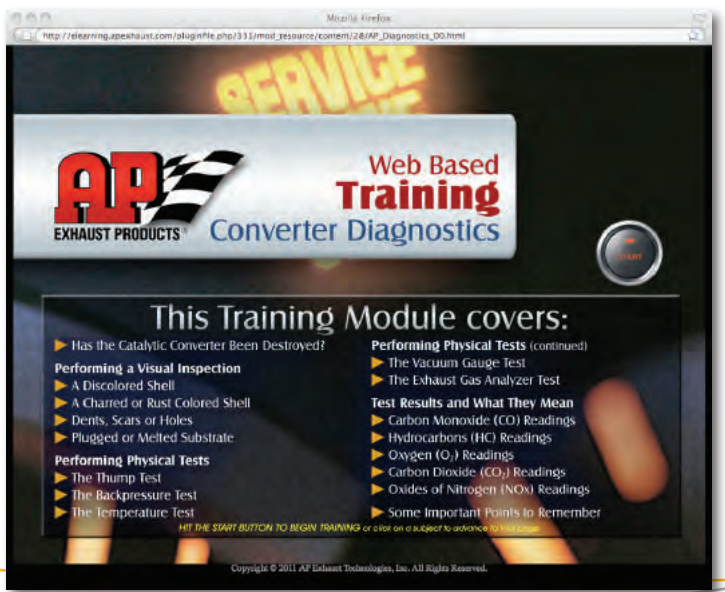

Through the online section of AP's website you can view complete OE replacement systems, performance exhaust and catalytic converters.

View up-to-date coverage enhancements, VIN and Plate lookup, and company news.

apexhaust.com

COUNTERPERSON & INSTALLER TRAINING

At AP, we are committed to the development and growth of our customers. As a part of this commitment, we offer online education and training courses for the Counterperson and the Technician/Installer.

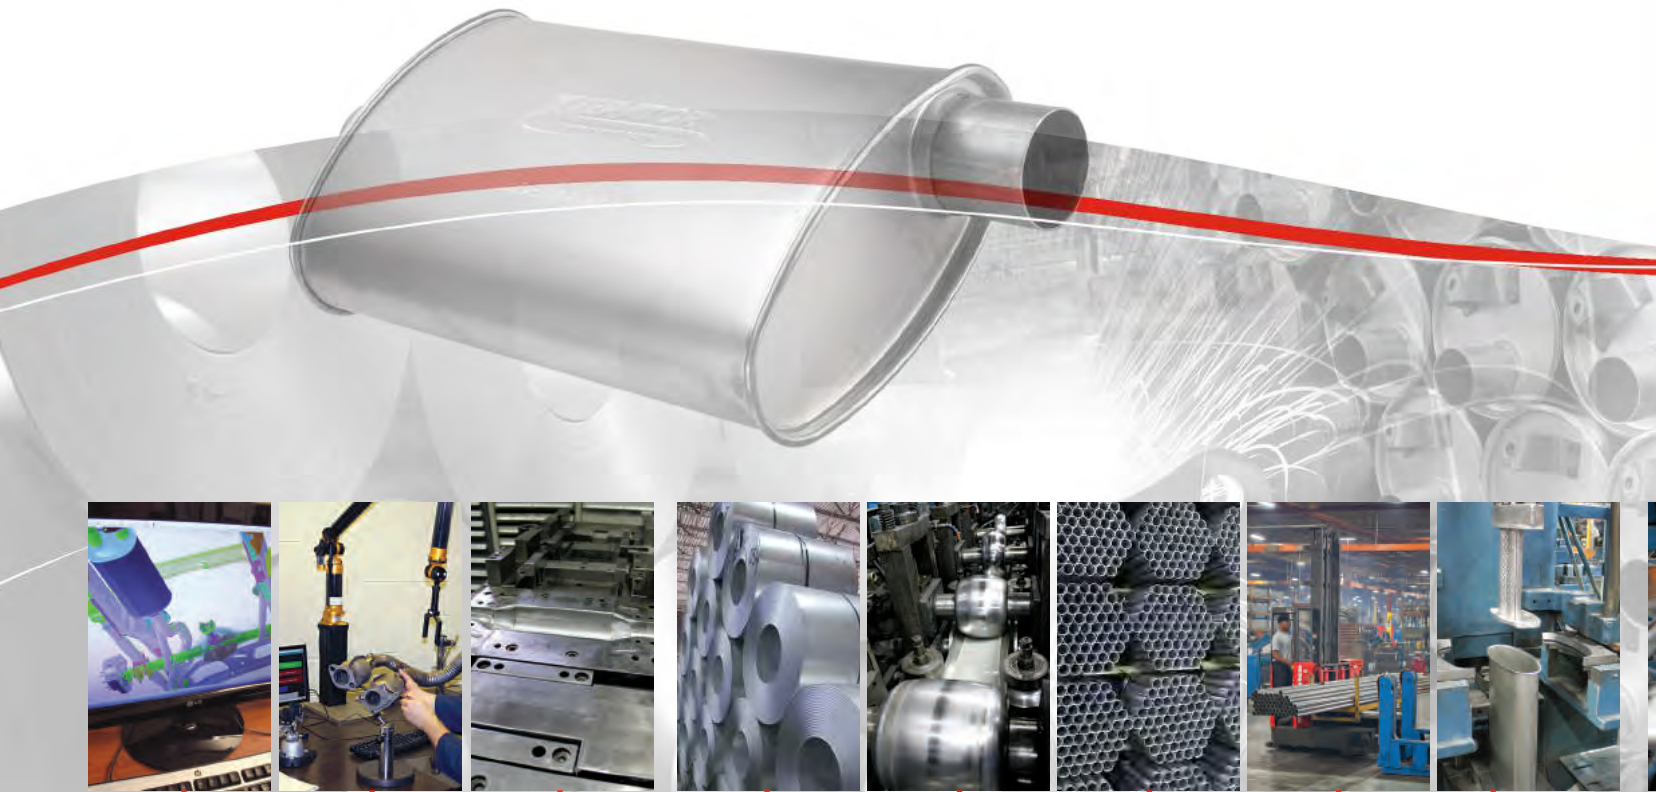

These courses are designed to en-hance the knowledge base for professionals as they practice their crafts by introducing the many offerings of AP Exhaust Technologies.

THE MANUFACTURING PROCESS

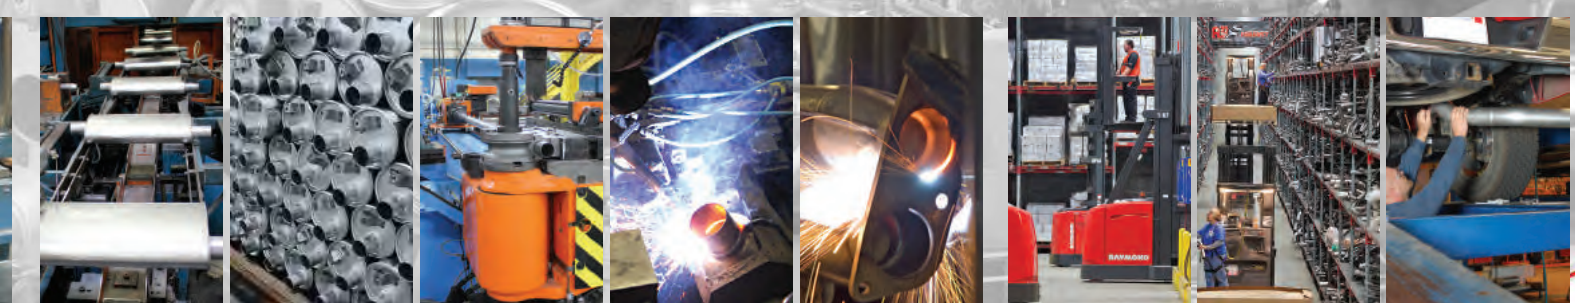

ENGINEERING

ENGINEERING

AP Exhaust Technologies is recognized as one of the world's most innovative producers of aftermarket exhaust and emission systems. At AP, development of these products begins in our engineering technical center where application research, and the use of state-of-the-art CAD systems, connect with prototyping, and tooling design processes for quicker development and release of new exhaust and emission products.

EXHAUST TECHNOLOGIES®

MANUFACTURING

DISTRIBUTION

MANUFACTURING

The minute a part is sold, the process begins for replenishment. AP deploys throughout its 440,000 ft² manufacturing facility a linked production system that consistently produces parts for an on-time delivery to our distribution center. Advanced automation, robotics, and computer controlled equipment assure that quality parts are in position at the right time. With multiple production areas ranging from steel coil processing, muffler assembly, pipe bending, and catalytic converter welding this modern approach to manufacturing reduces production lead times, and improves the quality of the products and accentuates the responsiveness to AP customer needs.

DISTRIBUTION

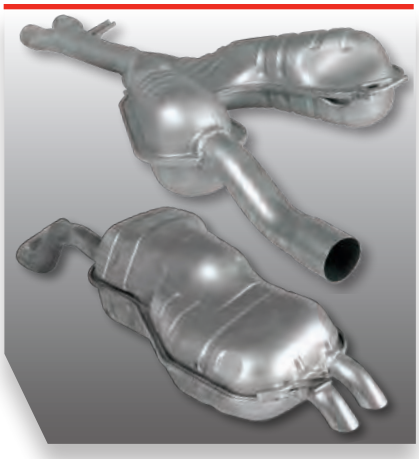

AP's strength is in our consistently high order fill rate maintained across all product lines. From our 250,000 ft² distribution center, daily shipments are processed quickly and accurately assuring that AP customers have the products they need in stock at all times. Using the latest in distribution processes and equipment, AP is leading the way in customer service and delivery.

HOW TO USE THIS CATALOG

Revised format:
The format of the exhaust application section of this catalog has been enhanced to simplify the look-up process. All specific vehicle application diagrams are listed in order by make, model, and then year, sequenced first by numbers then by letter.

To find your exhaust application quickly, follow these easy steps:

1. Locate the vehicle make and model in the Table of Contents section and proceed to the page number listed.
2. Applications are listed in order by newest to oldest model years. The first application listed will contain the newest year of coverage available, then going from the smallest to the largest model engine.
3. Appropriate footnote explanations will appear at the bottom of each page.
4. When optional parts are available, the information will appear at the bottom of each exhaust diagram image.

comment utiliser ce catalogue

Nouveau format :
La section d'applications d'échappement de ce catalogue bénéficie d'un format amélioré, visant à simplifier le processus de recherche. Tous les schémas d'applications spécifiques aux véhicules sont listés par marque, par modèle et par année, avec un classement utilisant d'abord les chiffres puis les lettres.

Pour trouver rapidement votre application d'échappement, exécutez la procédure simple ci-dessous :

1. Dans la section Table of Contents (Table des matières), repérez la marque et le modèle du véhicule, puis reportez-vous à la page indiquée.
2. Les applications sont énumérées selon un ordre allant des modèles les plus récents aux plus anciens. La première application listée correspond à l'année la plus récente disponible et présente les détails en allant du plus petit moteur au plus gros.
3. Des notes supplémentaires apparaissent au besoin dans le bas de chaque page.
4. Si des pièces optionnelles sont disponibles, les informations correspondantes apparaissent dans le bas de chaque schéma d'échappement.

cómo utilizar este catálogo

Formato revisado:
El formato de la sección de aplicaciones de escape de este catálogo se ha mejorado para simplificar el proceso de búsqueda. Todos los diagramas específicos de la aplicación para vehículos figuran en orden por marca, modelo y año, con una secuencia primero por número y luego, por letra.

Para encontrar la aplicación de escape rápidamente, siga estos pasos simples:

1. Ubique la marca y el modelo del vehículo en la sección Tabla de contenidos y continúe en el número de página indicado.
2. Las aplicaciones aparecen ordenadas por año de modelos, de los más nuevos a los más antiguos. La primera aplicación contiene el año de cobertura disponible más nuevo; luego va del modelo de motor más pequeño al más grande.
3. En la nota al pie que se encuentra en la parte inferior de cada página aparecerán las explicaciones correspondientes.
4. Si existen partes opcionales, la información aparecerá en la parte inferior de cada imagen del diagrama del escape.

ENGINE DISPLACEMENT-CONVERSION CHARTS

CYLINDRÉE DU MOTEUR – TABLEAUX DE CONVERSION
DESPLAZAMIENTO DEL MOTOR – TABLAS DE CONVERSIÓN

Domestic Cars

TO CONVERT:

CUBIC INCH TO LITER:
1 CUBIC INCH = .01639 LITER
Example:
351 x .01639 = 5.8L (5.75289)

LITER TO **CUBIC INCH**:
1 LITER = 61.02 CUBIC INCHES
Example:
5.8 (5.75289) X 61.02 = 351 CUBIC INCHES

Automobiles nord-américaines

POUR CONVERTIR :

POUCES CUBES EN LITRES :
1 POUCE CUBE = 0,01639 LITRE
Exemple :
351 x 0,01639 = 5,8 litres (5,75289)

LITRES EN **POUCES CUBES** :
1 LITRE = 61,02 POUCE CUBE
Exemple :
5,8 (5,75289) X 61,02 = 351 POUCES CUBES

Automóviles nacionales

PARA CONVERTIR:

PULGADAS CÚBICAS EN LITROS:
1 PULGADA CÚBICA = 0,01639 LITROS
Ejemplo:
351 x 0,01639 = 5,8L (5,75289)

LITROS EN **PULGADAS CÚBICAS**:
1 LITRO = 61,02 PULGADAS CÚBICAS
Ejemplo:
5,8 (5,75289) X 61,02 = 351 PULGADAS CÚBICAS

C.I.D.	LITER	C.I.D.	LITER	C.I.D.	LITER	C.I.D.	LITER

HOW TO IDENTIFY MODEL YEAR

CÓMO IDENTIFICAR EL AÑO DEL MODELO
COMMENT IDENTIFIER L'ANNÉE-MODÈLE D'UN VÉHICULE

Making The Vehicle VIN Work For You

Since 1981 models, Vehicle Identification Numbers have been in a 17-character format.

Each character or group of characters explains a particular trait of that vehicle. To properly identify vehicle applications in this catalog, you will need to familiarize yourself with the following 3 characters:

Character #5 - Engine Code

Character #10 - Model Year

Character #11 - Assembly Plant location.

Procédure d'utilisation du VIN de votre véhicule

Depuis 1981, les numéros d'identification de véhicule (VIN) sont présentés sous un format de 17 caractères.

Chaque caractère ou groupe de caractères décrit une caractéristique du véhicule. Pour identifier correctement les applications présentées dans ce catalogue, vous devez vous familiariser avec les 3 caractères suivants :

Caractère nº 5 : Code de moteur

Caractère nº 10 : Année modèle

Caractère nº 11 : Site d'assemblage

Cómo hacer que el VIN del vehículo le resulte útil

A partir de los modelos 1981, los Números de identificación vehicular tienen un formato de 17 caracteres.

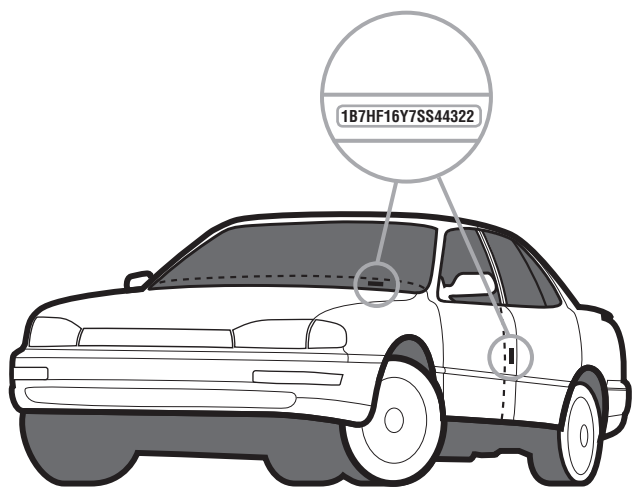

Cada carácter o grupo de caracteres explica una característica particular de ese vehículo. Para identificar adecuadamente las aplicaciones para vehículos de este catálogo, deberá familiarizarse con los 3 caracteres que figuran a continuación:

Carácter N.° 5: código del motor

Carácter N.° 10: año de modelo

Carácter N.° 11: ubicación de la planta de ensamblaje

A=1980	L=1990	Y=2000	A=2010
B=1981	M=1991	1=2001	B=2011
C=1982	N=1992	2=2002	C=2012
D=1983	P=1993	3=2003	D=2013
E=1984	R=1994	4=2004	E=2014
F=1985	S=1995	5=2005	F=2015
G=1986	T=1996	6=2006	G=2016
H=1987	V=1997	7=2007	H=2017
J=1988	W=1998	8=2008	J=2018
K=1989	X=1999	9=2009	K=2019

VIN Locations:

- Lower driver's side dashboard corner of windshield

OR

- On doorpost where driver's door latch meets.

OBD II

A GENERAL DESCRIPTION

OBD II refers to the On Board Diagnostics Generation Two Emissions System. This system first came into use on some 1995 passenger cars and all 1996 passenger cars and light duty trucks (generally, trucks with a G.V.W. of less than 8,500 lbs.)

OBD II systems monitor all emission control related devices on the vehicle.
The functions monitored are as follows:

Catalyst Efficiency
Oxygen Sensor Response
Engine Misfire
Evaporative Emission Leaks
Fuel System Supply
EGR System
Secondary Air Injection System
Engine Sensor Output

When a component or a system fails, the **MIL** (Malfunction Indicator Light), **Check Engine** light or **Service Engine** light will illuminate, alerting the driver that the vehicle needs servicing.

As for catalyst efficiency the system functions are as described below:

The OBD II system uses a rear or post converter oxygen sensor to monitor the percent content of oxygen leaving the catalyst as the engine fuel system cycles from rich to lean in response to the before catalyst (Pre-converter) oxygen sensor signal. The catalyst washcoat stores some oxygen during the lean cycles to aid in the oxidation process and releases it during the rich cycles. The rear oxygen sensor will produce a steady voltage signal if the catalyst oxygen storage capacity is correct. A fluctuating signal is an indication that the catalyst is not functioning properly and the **MIL** will come on.

Diagnosing is done with an OBD II scanner or through conventional sensor testing. Currently only the state of California prohibits the use of aftermarket converters for use on OBD II vehicles unless they have been shown to meet California Air Resources Board requirements. The United States Environmental Protection Agency does allow for aftermarket converter use and a copy of their position is shown on the following page.

If you have any problems or questions please call Customer Service at 1-800-277-2787,

OFFICE OF
AIR AND RADIATION

This is in response to your recent request for clarification concerning the sale of aftermarket converters for use on OBDII vehicles.

At the present time, the aftermarket converter policy does not specifically address the sale and/or use of aftermarket converters for OBDII vehicles. Therefore, at this time, my opinion is that companies can market and install aftermarket converters if they meet all the requirements of our policy, specify that their use will meet the requirements of the policy for these type of vehicles, specify which specific vehicles they can be used on, and provide the required warranty for the required time periods. The required aftermarket converter warranty should cover any converters in which the MIL illuminates because of a catalyst failure so manufacturers should only market aftermarket converters for those vehicles which are also good enough that the catalyst monitor will not detect a problem for the required 25,000 mile performance period. Thus, the liability for a catalyst failure within the required warranty period would be on the converter manufacturer and the installer if they market or install the aftermarket converters for those applications.

There are still restrictions that aftermarket converters can only be installed on vehicles under certain limited circumstances such as only after the emissions control warranty (8/80 for catalysts on 1995 and newer vehicles) expires, etc. Therefore, at this time, I see a limited need for these installations. However, this will obviously be more of an issue in the future.

I hope this responds to your questions. Please feel free to contact me if you have further questions, comments, or suggestions concerning this issue.

Sincerely,

Steve Albrink

X - Pipes

- **Mandrel Bent**
- **Aluminized Steel**
- **Available in 3 Sizes**

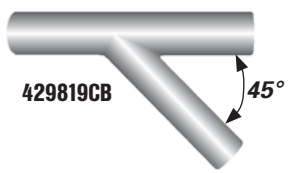

Universal X-Flow pipes increase horsepower and reduce noise levels. They work like an H-pipe balance tube, but give your vehicle better performance by increasing exhaust scavenging and balancing the exhaust pulses.

SPOUTS

TAIL SPOUTS

Recommended for passenger cars and trucks not equipped with a tail pipe. Can also be used with tractor mufflers to deflect exhaust gases away from the operator. For horizontal or vertical mounting.

GLASSPACKS

- Aluminized Heavy Duty, 15 Gauge, 3", 3½" and 4" Diameter Shells
- Spiral Louvered Inner Core Produces a Deep, Mellow Tone, Decreases Backpressure and Increases Performance
- AKDDQ Necks Allow For Easy Expansion
- Single Packs

PART NUMBER DEFINITION

Example: 351811

First two digits = Shell Diameter (35=3.5=3½)
Second two digits = Shell Length (18")
Third Two Digits = Configuration:
- 00 = Blank
- 11 = Center/Center
- 12 = Mild Offset/Mild Offset
- 22 = Full Offset/Full Offset

Seventh digit indicates neck size greater than 2¼":
- 3 = Two 2½" Necks
- 4 = Two 3" Necks

Seventh or Eighth digit:
- 2 = 2¼" Core Size
- 5 = 2½" Core Size
- 6 = 3" Core Size

ALUMINIZED TURBOPACKS & TORPEDOPACKS

TURBOPACKS & TORPEDO PACKS

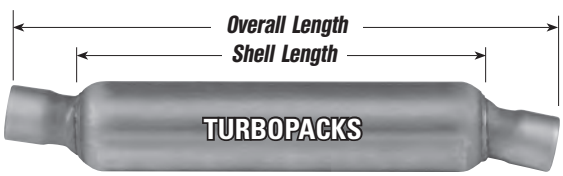

- Featuring The Versatility of a Glasspack with The Sound Performance of a Turbo Muffler
- 2 Tube, 2 Baffle Internal Design Provides Turbo Tuning For Superior Sound Control
- Aluminized Heavy Duty, 15 Gauge, 4" Diameter Shell
- Aluminized AKDDQ Necks Allow For Easy Expansion
- Single Packs

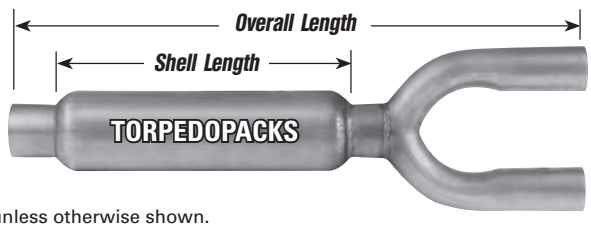

PART NUMBER DEFINITION

Example: 4218112

First two digits = 4" Shell; 2 Designates Turbo Pack
Second two digits = Shell Length (18")
Third Two Digits = Configuration:
- 11 = Center/Center
- 12 = Mild Offset/Mild Offset
- 22 = Full Offset/Full Offset

Seventh digit indicates neck size other than 2" on both ends
- 1 = One 2 ¼"; One 2" Neck
- 2 = Two 2 ¼" Necks
- 3 = Two 2 ½" Necks

TURBOPACKS * Neck Offset – Inlet and Outlet dimensions I.D. unless otherwise shown.

ELBOWS

WELDING OF ALUMINIZED MATERIAL

Gas Welding

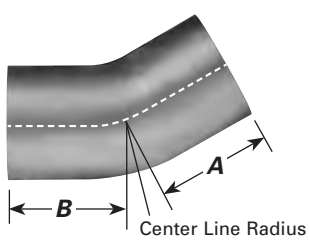

1. Adjust gases until there is a small soft blue flame extending beyond the inner cone ⅛" to ¼".
2. Use an AWS (American Welding Society) Number ER 7OS-2 welding rod or the equivalent. This rod has extra elements added to cause the aluminized coating to float on top of the molten puddle away from the inner weld structure.

Tig Welding

Use the same type welding rod as gas welding with argon purge gas.

Mig Welding

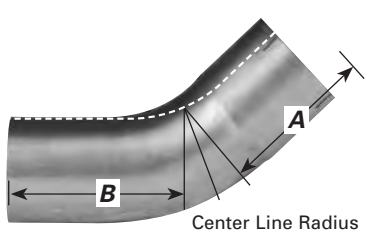

For typical exhaust components, use a copper clad, .035 inch to .045 inch diameter wire. Specifically use a low carbon steel wire, AWS Number 7OS-3 or the equivalent.

FLEXIBLE TUBING

PROCEDURE FOR CUTTING FLEXIBLE TUBING

NOTE: Flexible tubing coils are in a contracted state. Before cutting, anchor one end and pull and/or snap the coil to bring it back to its proper length.

HACKSAW: (For less frequent cutting)
WIDTH: ½" or ¾"
TEETH: A no set blade is preferred, although it is usually hard to find locally - 14 tooth or finer.

BANDSAW: (For less frequent cutting)
WIDTH: ½" or ¾"
TEETH: A no set blade - 14 tooth, run at 350 feet per minute.
A bi-metal blade gives more cuts per dollar than an ordinary carbon steel blade.
Lenox seems to be the best blade for our applications.

STRAIGHT TUBING ALUMINIZED

- Manufactured from Aluminum Killed Deep Drawing Quality Steel - Prevents Splits and Wrinkles
- Re-aluminized Weld Seam - Better Appearance and Helps Prevent Corrosion
- All the Necessary Diameters, Lengths and Gauges For Your Bending Needs

TOOLS

CUT OFF WHEELS

Part No. UP1150
(Three replacement cutting wheels)

PIPE HOOKS

Part No. FPH51 – (1½" to 2½" Dia.)
Foreign car pipe hooks.

Part No. PH450 – (2¾" to 4" Dia.)
H.D. pipe hooks.

Part No. PH50 – (1½" to 2½" Dia.)
Pipe hooks.

Part No. PH550 – (5" to 6" Dia.)
H.D. pipe hooks.

ACCESSORIES

Part No. BB1 – Bin Box
Part No. BB2 – Bin Box
Part No. AP2025 – Gasket/Flange Board
Part No. GC1 – Gasket Cards

MUFFLER CEMENT

Part No. T27 – 16oz.
This high-performance muffler cement applies like putty but dries metal hard. Available in cases of 12 only.
